Note: To protect student privacy, data are suppressed (*) on the Five-Year Cohort Graduation and Outcome Reports if the cell size within a selected student population (cohort students) is 10 or less. Additionally, on the Ethnicity reports, "Not Reported" is suppressed, regardless of actual cell size, if the student population for one or more other ethnicity groups is suppressed. For more information about the Five-Year Cohort Graduation Rate and Outcome Data, please visit the [Information about the Five-Year Cohort Graduation Rate](#) page.

*Charter school data are removed by default from all district-level DataQuest five-year cohort graduation rate, five-year cohort outcome, and four-year and five-year cohort graduation rate comparison reports, including the associated state and county Report Totals. The "non-charter" default on district-level reports is also applied to the county-level and state-level data displayed in the Report Totals. To include charter school data in district-level reports, select the "Reset Filters" button on district-level reports to show data for "All Schools" OR select the desired School Type filter from within the expandable Report Filters menu on the desired DataQuest report.

** Results produced using the Alternative School report filter on the DataQuest five-year cohort graduation rate, five-year cohort outcome, and four-year and five-year cohort graduation rate comparison reports will NOT provide the same results or information on the graduation rates of schools approved with a Dashboard Alternative School Status (DASS). While DataQuest reports the five-year cohort graduation rate for DASS schools, the Dashboard reports a one-year graduation rate for these schools. The Alternative School filter is strictly intended to facilitate comparisons of the five-year cohort graduation rate within the DataQuest reports, which do not include any "one-year" rates for DASS schools. For more information regarding DASS school accountability please click [here](#).
